```java
package com.itbulls.learnit.javacore.controlstatements.hw;

public class AdminGuestMode {

    public static void main(String[] args) {
        String inputArguments = String.join(",", args);
        String adminFlag = "--admin";
        String guestFlag = "--guest";
        if (inputArguments.contains(adminFlag) && inputArguments.contains(guestFlag)) {
            System.out.println("Please, select either 'ADMIN' or "
                            + "'GUEST' mode for this program");
        } else if (inputArguments.contains(adminFlag)) {
            System.out.println("Hello, Admin!");
        } else if (inputArguments.contains(guestFlag)) {
            System.out.println("Hello, Guest!");
        }

    }

}
```
