```java
package com.itbulls.learnit.javacore.oop.interfaces;

public interface PaymentProcessor {

        int RETRY_ATTEPMPTS = 5;

        void processPayment(PaymentData payment);

        default void someDefaultMethod() {
                System.out.println("This is the default method");
        }

        static void someStaticMethod() {
                System.out.println("This is the static method");
        }

}
```
